

Oar Pattern
From Project Just Right
May 2007

Notes:

Not to scale. Oar shaft exaggerated to show taper from oarlock to grip and to blade.
For a longer oar, keep blade the same size and lengthen shaft.
Blade is 6MM plywood. Shaft can be clear fir. Use nominal 2 x 2 which is 1 5/8 square.
Shaft cross section can be octagonal or round.
See photos for shaping spoon blade oar shape.
